ALDON TECHNOLOGIES SERVICES PTE LTD

Introduction

ALDON is proud to provide our Supply of Metal parts by working with our quality principals from US and around our regions.

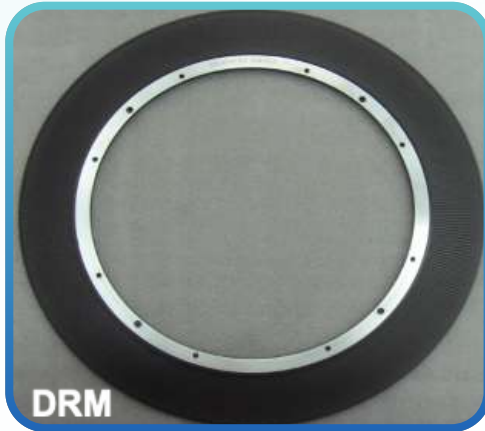

By drawing on their respective areas of expertise, we are able to provide our customers with a wide range of products that are of best quality with competitive pricing.

Over the years, we have also built-up extensive capabilities in reverse engineering and providing modifications to help customers resolves their chronic issues.

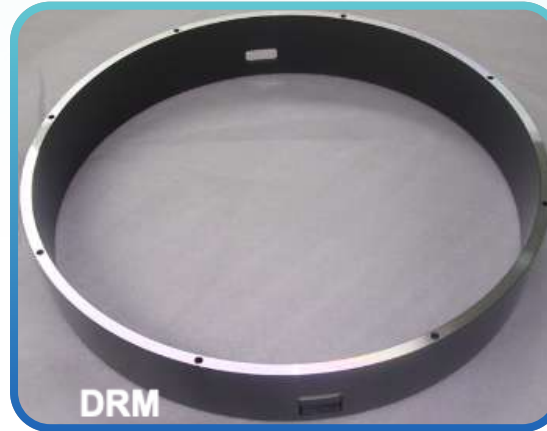

Metal Material Overview

Metal materials are essential in semiconductor wafer fabrication equipment, providing the structural strength, thermal stability, and precision required for demanding process environments. Our range of high-quality metal components is designed to support reliable operation in vacuum, high-temperature, and corrosive environments, while maintaining strict cleanliness and dimensional accuracy required in semiconductor manufacturing. We supply precision-machined and surface-treated metal parts manufactured to meet the stringent standards of semiconductor wafer fabrication processes.
